8-Phase Complete Curriculum

1 **Design Fundamentals**

Color Theory • Typography • Visual Hierarchy • Grid Systems • Layout Principles

2 **User Research (UX)**

User Personas • Empathy Maps • Journey Mapping • Competitor Analysis • User Interviews

3 **Wireframing & IA**

Information Architecture • Low-Fidelity Sketches • Wireframing in Figma/Miro • User Flows

4 **Visual Design (UI)**

High-Fidelity Mockups • Iconography • Material Design (Google) • Human Interface (Apple)

5 **Figma Mastery**

Auto-Layout • Components & Variants • Interactive Prototypes • Smart Animate

6 **Design Systems**

Building Style Guides • Tokenization • Atomic Design Methodology • Documentation

7 **AI-Driven Design**

Midjourney for Assets • Adobe Firefly (Generative Fill) • Uizard (Sketch to UI) • ChatGPT for UX Copy

8 **Live Internship**

Real client projects at i3Infosoft • Developer Handoff (Zeplin/Dev Mode) • Portfolio Review

Why AI in Design?

Designers who use AI are 10x faster. In this course, you won't just learn to draw; you will learn to **generate assets, automate variations, and write UX copy** using the latest AI tools, making you a highly productive "Product Designer".

Technical Stack & Career Support

Tool Stack You Will Master

Figma   Adobe XD   Adobe Photoshop   Adobe Illustrator   Miro   Midjourney
